THE BOTTOM LINE

- 01 Signals:** 11 of 12 indicators are positive and sentiment reads Greed (70). Long liquidations are the lone negative.
- 02 Flows:** Spot Bitcoin ETFs recorded inflows across the first two October sessions, and Strategy added another 334 BTC.
- 03 Structure:** OKX and ICE filed for 24/7 tokenized equity trading, and community banks sued over OCC trust charters for crypto firms.

MARKET SNAPSHOT

Updated 12:21 PM UTC · 12 indicators

The market shows a greed-leaning profile with low volatility risk and accumulation-leaning capital flow. Memecoins lead sector rotation, and participation across tracked assets is broad.

SECURITY · DECRYPT

Near Intents Exploiter Returns About \$3.8M After 48-Hour Deadline

Near Intents said roughly \$3.8 million drained in a Thursday exploit was returned in full after the team told the attacker it had identified them and set a 48-hour deadline. Resolutions this fast are less common than prolonged bounty negotiations.

THE TOP NEWS STORIES

Bitcoin held near \$85.9K as the dollar strengthened. Corporate treasury activity and changes to U.S. crypto oversight led the news flow.

FLOWS · DECRYPT

Spot Bitcoin ETFs Record Inflows to Open October

Spot Bitcoin ETFs took in [\$134.4M: confirm against dashboard] across the first two sessions of October, reversing a Sept. 30 outflow after a weak jobs report lowered expectations of a Fed rate hike.

Why it matters: Two sessions is a limited sample. Sustained flows over the coming week are the better signal.

CORPORATE TREASURIES · THE BLOCK

Strategy Adds 334 BTC; Holdings Pass 848,000

Strategy bought 334 BTC for \$28.7 million, lifting total holdings above 848,000 BTC. That is roughly 4% of the 21 million supply cap and about \$73 billion at current prices.

Why it matters: The accumulation signals strong conviction, and it ties a growing share of supply to one company's balance sheet decisions.

CORPORATE TREASURIES · DECRYPT

Metaplanet Sells 10,000 BTC, Repurchases 11,000

Metaplanet sold 10,000 BTC in Q3 and bought back 11,000, taking total holdings to 44,000 BTC. CEO Simon Gerovich said the move answered rating agency questions about whether a treasury company would sell to meet obligations.

Why it matters: The open question is whether rating agencies and regulators accept a self-initiated liquidity test as credible evidence.

NETWORK · COINDESK

Ethereum Staking Exit Queue Reaches 2026 High

The validator exit queue reached its longest level of 2026 in early October, with [queue size: confirm 786K vs. 1.5M ETH] waiting and a wait of [confirm: ~14 vs. ~25 days]. Researcher estimates attribute more than half of the queue at its Oct. 2 peak to MetaMask.

Why it matters: Staking exits are not instant. Liquidity planning should allow for multi-week queues.

MARKET STRUCTURE & POLICY

MARKET INFRASTRUCTURE · DECRYPT

OKX and ICE File for 24/7 Tokenized Equity Trading

A joint venture between OKX and ICE, the owner of the NYSE, filed with the SEC under its new Innovation Exemption. It would offer 24/7 tokenized trading in more than 60 US-listed stocks, including Nvidia and SpaceX, paired with stablecoins.

Why it matters: It is a formal link between exchange infrastructure and crypto rails. Approval and scope are the items to watch.

[Read at Decrypt](#) →

BANKING · DECRYPT

Community Bankers Sue Over OCC Trust Charters for Crypto Firms

The Independent Community Bankers of America filed suit arguing that OCC national trust charters give crypto firms a "side door into the banking system" without the safeguards that apply to banks.

Why it matters: The outcome could shape how easily crypto companies connect to the traditional financial system.

POLICY · DECRYPT

Jay Clayton Named to Lead Federal AI Policy Coordination

President Trump named Jay Clayton, the former SEC chair who oversaw the agency's lawsuit against Ripple, to lead a new "Super Intelligence Force" coordinating federal AI policy.

Why it matters: Direct crypto impact is limited. It is mainly a signal of how the administration is staffing technology oversight.

COMPLIANCE · COINDESK

Treasury Action Cites Crypto in Hamas Fundraising Network

A Treasury Department action identified crypto use within a Hamas-linked fundraising network totaling [amount: confirm \$2M vs. \$8M].

Why it matters: Illicit-finance cases keep compliance scrutiny high. On-chain transparency is also what makes these networks traceable.
